

BEFORE BIRTH,
*the infant's world
 is rhythm and sound; the thump
 and roar of the mother heart,
 to which the infant kicks,
 flips, and dances in the dark.
 With such early prompting,
 no wonder we humans revel in music.*

WHAT JOY,
*then, after birth,
 to learn that such a dance
 can continue, courtesy of
 maestro Mozart. And how
 reassuring to parents to know
 that hearing such wondrous music
 just might boost brain development
 in their spirited little acrobats.*

JOHN STONE, M.D.
 Cardiologist and Poet
